Hospital

OCCUPATIONAL THERAPY

Acadia St. Landry Hospital's outpatient occupational therapy program encompasses a wide range of services, including activities of daily living (ADL) training, ergonomic assessments, cognitive rehabilitation, and adaptive technology training. We address physical, cognitive, and emotional aspects to foster overall well-being.

Our Occupational Therapists are dedicated to helping you regain the skills necessary for daily living – from self-care routines to work-related tasks. Through adaptive techniques and assistive devices, you'll find new ways to engage in meaningful activities and lead a fulfilling life.
