SPEECH THERAPY

Whether you're seeking speech therapy for your child or for yourself, Acadia St. Landry Hospital's outpatient Speech Therapy program caters to both pediatric and adult populations. We understand the distinct challenges and goals at different stages of life, tailoring our services to provide effective solutions for all age groups.

Whether you're working through speech, language, voice, or swallowing difficulties, our Speech Therapists use evidence-based techniques to help you communicate effectively and improve your overall quality of life.
